

Paul Storr (Westminster 1771 - Tooting 1844)

A William IV Vase on Plinth

Silver-Gilt (the plinth gilt-metal mounted)

London, 1835

Maker's mark of Paul Storr

Height: 52.5cm, 20.7in.

Weight: 3868g, 124oz

Campana shaped, the lower body part fluted, with bifurcated reeded handles and an egg-and-dart rim, on square foot with foliage cast stem, engraved on one side with an inscription and on the other with a coat-of-arms, on gilt-metal mounted blue stone plinth.

The inscription reads 'To Sir John Trollope Bart of Casewick From Sir John Thorold Bart of Syston Park
June 26th 1837'

The arms are those of Trollope for Sir John Trollope 7th Bt. (1800-1874) of Casewick, co. Lincoln. He was later created 1st Baron Kesteven in 1868. He married Julia Maria (d.1876), eldest daughter of Sir Robert Sheffield 4th Bt., in 1847. He was educated at Eton College and became a Captain in the 10th Hussars. He was later M.P. for Lincoln between 1841 and 1868 serving as president of the Poor Law Board in 1852.

Sir John Thorold 11th Bt. (1816-1866) of Syston Park, co. Lincoln, married Elizabeth Frances (d.1894), third daughter of Colonel Thomas Blackborne Thoroton-Hildyard, of Flintham Hall, co. Nottingham, in 1841.

The Trollopes and Thorolds were both prominent Lincolnshire families. They intermarried on a number of occasions, firstly in 1759 when Isabella (d.1803), daughter of Sir John Thorold, 8th Bt. (1703-1775) married Thomas Middleton Trollope (1721-1779), eldest son of Sir Thomas Trollope, 4th Bt. (1691-1784).

Provenance:

Presented to Sir John Trollope 7th Bt. (1800-1874) of Casewick, co. Lincoln by Sir John Thorold 11th Bt. (1816-1866) of Syston Park, co. Lincoln, on 26 June 1837

Artist description:

Son of Thomas Storr of Westminster, first silver-chaser later innkeeper, born 1771. Apprenticed c'1785. Before his first partnership with William Frisbee in 1792 he worked at Church Street, Soho, which was the address of Andrew Fogelberg, This is also the address at which Storr's first separate mark is also entered. First mark entered as plateworker, in partnership with William Frisbee, 2 May 1792. Address: 5 Cock Lane, Snow Hill. Second mark alone, 12 January 1793. Address: 30 Church Street, Soho. Third mark, 27 April 1793. Fourth 8 August 1794. Moved to 20 Air Street, 8 October 1796, (where Thomas Pitts had worked till 1793). Fifth mark, 29 November 1799. Sixth, 21 August 1807. Address 53 Dean Street, Soho. Seventh, 10 February 1808. Ninth, 21 October 1813. Tenth, 12 September 1817. Moved to Harrison Street, Gray's Inn Road, 4 March 1819, after severing his connection with Rundell, Bridge and Rundell. Eleventh mark, 2 September 1883. Address: 17 Harrison Street. Twelfth and last mark, 2 September 1833. Heal records him in partnership with Frisbee and alone at Cock Lane in 1792, and at the other addresses and dates above, except Harrison Street. Storr married in 1801, Elizabeth Susanna Beyer of the Saxon family of piano and organ builders of Compton Street, by whom he had ten children. He retired in 1838, to live in Hill House in Tooting. He died 18 March 1844 and is buried in Tooting Churchyard. His will, proved 3 April 1844, shows an estate of £3000. A memorial to him in Otely Church, Suffolk was put up by his son Francis the then incumbent of the parish. For full details of Storr's relationship with Rundell, Bridge and Rundell please see N.M. Penzer, 1954 or Royal Goldsmiths, The Art of Rundell and Bridge, 2005.

Storr's reputation rests on his mastery of the grandiose neo-Classical style developed in the Regency period. His early pieces up to about 1800 show restrained taste, although by 1797 he had produced the remarkable gold font for the Duke of Portland. Here, however the modelling of the classical figures must presumably have been the work of a professional sculptor, as yet unidentified, and many of the pieces produced by him for Rundell and Bridge in the Royal Collection must have sprung from designs commissioned by that firm rather than from his own invention. On the other hand they still existed in his Harrison Street workshop, until destroyed in World War II, a group of Piranesi engravings of classical vases and monuments bearing his signature, presumably used as source material for designs. The massiveness of the best of his compositions is well shown in the fine urn of 1800 at Woborn Abbey, but the Theocritus Cup in the Royal Collection must be essentially ascribed to the restraint of its designer John Flaxman, while not denying to Storr its superb execution. Lord Spencer's ice pails of 1817 show similar quality. Not all Storr's work however was of classical inspiration. The candelabra of 1807 at Woburn derive from candlesticks by Paul Crespin of the George II period, formerly part of the Bedford Collection, and he attempted essays in floral rococo design from time to time, which tend to over-floridity. On occasions the excellence of his technical qualities was marred by a lack of good proportions, as in the chalices of the church plate of St Pancras, 1821. In spite of these small lapses there is no doubt that Storr rose to the demands made upon him as the author of more fine display plate than any other English goldsmith, including Paul De Lamerie, was ever called upon to produce.
